### Product Description

**Natural Glo logs are THE BEST fake wood logs on Amazon. Wondering why?**

These ceramic wood logs last! Don't wind up buying another cheap set in a couple months. Get the best now and forget about it. We also ship in a molded foam package to keep your logs safe during transit.

Natural Glo artificial gas logs are safe! They don't emit toxic fumes the way that some lower quality fake fireplace logs do.

Set these logs up any way you'd like. Their realistic look and large size allow you the option of arranging them in your own way and still having the look of a real, full fire.

**Enjoy the natural heat of a fire inside or outside without the headache that real wood can be!**

The porous ceramic fiber emits the heat from the fire brilliantly. Much warmer than cut glass or cement logs. Please consult a local expert before installation.

**Again, Amazon Buyers Trust Natural Glo to Provide Premium Ceramic Gas Logs. We do EVERYTHING we can to make sure you have the best buying experience possible.**

**See why these are the "HOTTEST" logs around!!**

**Unparalleled Detail**

The detail on our logs makes for a fire experience that feels "natural." There is a reason we're called Natural Glo!

**Use Inside or Out**

Whether you want to spruce up your outdoor fire pit or your indoor fireplace, these are the logs for you.

Our ceramic fiber logs are versatile. They go great in an old school fire pit, a modern fire table with lava rock or glass, or an indoor gas fireplace.

Before switching anything - Gas logs included - with any indoor fireplace, PLEASE BE SURE TO CHECK WITH A LOCAL EXPERT. There are 100's, if not 1000's of variations of fireplaces and fire codes across the USA and it is very important that you proceed with caution when it comes to lighting a fire in your home.

**Individual Logs Give You Individual Freedom**

Arrange your logs based on your needs. You receive 10 logs with 5 different designs to allow you to use your creativity. Stack the logs in an orderly fashion or mimic nature by placing them at random.

**Be sure to leave at least 1.5 inches between the logs and your gas orifices. Blocking these orifices is what causes incomplete gas combustion which can lead to odors, carbon buildup (Which then becomes soot), or other damage.**

Also, be sure that your fireplace is clean before using because any unburned organic material will also combust and create particles.

### Plenty of logs, good price

Reviewed in the United States on December 12, 2016

**Verified Purchase**

Reading the reviews left me wondering if I was going to have a bunch of extra space left over in my fireplace. I think the difference in everyone's review based on size as everyone has a different fireplace so some people have a 3 foot wide fireplace and of course 10 to 15 inch logs don't exactly feel up a 3 foot wide fireplace.

I included a five iron golf club in the picture so you could have a reference for how big or small your fireplaces as you can see I have all the logs that came in the package and I couldn't quite fit them all on so I had to set one in front

### Amazingly real looking fire!

Reviewed in the United States on August 12, 2019

**Verified Purchase**

I ordered these logs because they were bigger than most. My lava rock bed gas fire pit is over 2 ft in diameter. I thought the logs were a bit pricey, but I went for it. Wow! These things are great! First of all, they are very light weight. They almost feel fragile because of the light weight. There are 5 styles of logs, 2 per, for a total of 10 logs. You can stack them up however you want. When seen in the day, let's face it, they look like fake logs. There is just no way around it. But at night, that is when the magic happens. When I light the burner, the flames are pure blue and you think, OK, that looks nice. Nothing special. Wait...after about 10 minutes of warm up, the logs glow a beautiful orange on the bottom and the flames turn yellow. After 20 minutes, the logs are fully warmed up and it really looks like a real campfire burning! Without the smoke! I have had several folks over for an evening on the new patio and they all comment about how realistic looking the fire is. Love these logs and would buy them again! Worth every penny.

**The cheapest will suffice I guess**

Reviewed in the United States on November 19, 2019

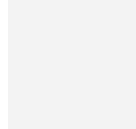

**Verified Purchase**

I don't know how old the old logs were, but they were as heavy as concrete. So when I got these and found they were hollow and about 1/20 the original weight, I tried to keep an open mind.

Install was easy. There's hardly any differentiation between the thicknesses of these logs. There's 6 different molds and two of each mold. And no matter how I stacked them, they just look... so meh. The flat bottoms are fake looking and impossible to hide.

That said, it's WAY cheaper than my options at Lowe's or the local fireplace store. So I'll use them until it aggravates me enough to buy better ones.

If i had it to do over again, I'd spend a little more for something better than these. But I'm happy enough for this winter at least.

Ram

**Buy a better quality ones.**

Reviewed in the United States on January 2, 2019

**Verified Purchase**

Decent logs for the money but they started turning black and emitting soot particles. You will be better of spring may be a little more and trying something else. Although our fireplace is vented and I don't think the soot particles come inside .. we can still smell them and once they start developing black burns it starts looking a bit ugly. Will be looking for other options soon.

**Very realistic! UPDATE The SMELL won't go away, had to go back to real firewood.**

Reviewed in the United States on December 31, 2019

**Verified Purchase**

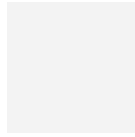

UPDATE: After using these logs the initial SMELL never went away. I actually had someone come in the house and asked WHAT that smell was and they went to the FP and it was these logs. I smelled it when I first started with these logs but thought surely it would go away... it has t. So I have gone BACK to real firewood... what a waste. Very disappointed. I have a gas start FP and LOVE wood

**ABSOLUTELY PERFECT LOGS**

Reviewed in the United States on December 19, 2019

**Verified Purchase**

I purchased these Natural Glo Large Gas Fireplace Logs (10 Piece) and I could not be happier.

They are absolutely perfect for a fire anytime of the year.

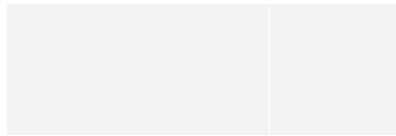

I did look at the instructions on how to place the logs but decided to try my own style and it is beautiful.

The logs are very light weight and easy to maneuver in any position. I love the style of the logs from large, medium and small.

My family and I are completely delighted with the purchase.

Great value!!!

**They look good, but don't fit well together.**

Reviewed in the United States on December 17, 2018

**Verified Purchase**

I like these well enough to leave them in my fireplace until they break from the stress repeated heating and cooling create.

They are meant to be placed however you want however, they have notches and grooves that indicate they're meant to be placed in a specific order. No specific guide for placement was included so with the notches and grooves they don't look terribly realistic. It's a shame, too. The coloring on this set is great!

As long as you're not looking for a specific look or pattern these will do nicely.

Thomas

**Did everything we needed it to do.**

Reviewed in the United States on February 10, 2019

**Verified Purchase**

We decided to switch from wood to gas this year. Wood is great, but tired of always fighting with the arrangement, hauling in wood, and having to order and store wood for burning. We wanted a decent sized arrangement, without spending a fortune, and "wood" look nice and

natural. This met all our criteria.

First, make sure you have a proper setup with the burner, sand, and ember. We actually did our own setup using an old aluminum cooking pan for a pan, as the gas setup was what came with the house when we bought it. The most difficult task was finding the right setup to look like a real fire. This means stacking, re-stacking, and stacking again. I might think this is an issue, but this is a one and done, not like a real wood fire which means constant care and feeding throughout the evening.

All I can say, is it was worth the investment.

#### Great product to light up your life...

Reviewed in Canada on September 21, 2019

**Verified Purchase**

I'll update this with pictures later, however I can assure anyone that is looking for a quality log at a good price these are the ones. They are the same as any with a UL listing, probably made in the same factory. They are lightweight, realistic in design and in comparison to the OEM Napoleon logs that were my alternative, not only were they 1/4 the price, they look better and perform the same...My fireplace is an older Napoleon, 38000 BTU natural gas with an approximate 30" wide glass door, 21" wide at the back, and only 8" in depth. There is no grate although there is a ledge on the rear panel approximately 4" from the base. As you will see when I update this with pictures this ten log package is perfect. I couldn't be happier, I previously paid more than this for some grey stones from Napoleon that didn't even cover the base of the fireplace. After continual use for the last three weeks, (the fireplace is all I use in the winter to heat a 1100 sq ft condo) the performance of these logs is comparable to any. Yes, they will develop a black soot in places, so did any Napoleon logs or stones that I've used, and that can be wiped off if you choose to. These logs actually glow in areas very close to the flame or in the flame, which others did not. The effect is as if the logs were real.
