

GENERAL NOTES:

- A. Field verify all conditions and dimensions.
- B. Provide miscellaneous demolition required for new work, whether specifically called out or not.
- C. Field verify location of all utilities, improvements, etc.
- D. Patch and repair sod as required for new landscaping at concrete site elements.
- E. Protect all site elements to remain. Any site elements damaged in the course of this project shall be patched and repaired at no additional expense to the Owner.
- F. Existing vinyl floor tiles in storage building contain asbestos and will be removed, remediated, and disposed by Owner prior to work commencing on this project. Report any additional asbestos material to Architect as soon as it is encountered.

KEYED NOTES:

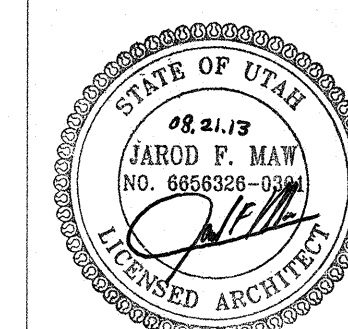

- 1. Existing building to remain.
- 2. New building: concrete footing, foundation, and slab with building package - re: A/A1.1 (building package furnished by Contractor, installed by Owner).
- 3. Completely remove existing storage building including footings, foundation, slab, wood stud walls and trusses, and all finishes after construction of new storage building is complete.
- 4. Retain and protect existing trees.
- 5. Existing dirt road.
