Has the SWPPP been updated to reflect the current site conditions (modifications dated & initialed on site man, new BMPs on		/	X
name Aqualifications, weather, problems/repairs, corrective action, new BMPs, removed BMPs, discharges, etc.) 5. Have all Corrective action Rems from previous inspections been addressed and documented within the time frame allotted by the inspector? 5. Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g., perimeter controls, berms, silt fence, purprieter tourned y diversion, down gradent boundings sediment control, etc.) 7. Is there evidence of sediment discharge such as must flows or soil deposits from the construction site in downstream locations? 8. Is there evidence of sediment discharge such as must flows or soil deposits from the construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a storm drain or washer body? 9. Is there sall, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a storm drain or washer body? 10. Is there a need to repair, maintain, or improve section control BMPs (silt fence, check dams, filter rolls, sediment trap/basin, inlet protection, wattles, trave balls, cute; Opportunity, piles placed down, fleeling areas, concrete washed ut area, proper cute rangs, sall prevention, etc.)? 11. Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, travers balls, cute, out-pades, self-control, etc.)? 12. Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction, etc.)? 13. Are there disturbed areas that have not had construction advisible for 14 to 21 days without stabilization? (except snow or fozen ground)? 14. Are there places where BMPs are needed and should be tracked and should be tracked or the proper or	BMPs crossed off site map, new BMP details & spec's in SWPPP, SWPPP amendment Log. etc.)?			X
5. Have all corrective action items from previous inspections been addressed and documented within the time frame alloted by the inspector? An Ars Wife how setting and leaving the construction site controlled, managed, or diversed around the site? (e.g. perimeter control, berms, silt fence, purposed in the construction of the construction of the site of the construction site? It is there evidence of sediment discharge such as much flows or soil disposits from the construction site in downstream locations? It is there evidence of sediment discharge such as much flows or soil disposits from the construction site in downstream locations? It is there are evidence of sediment discharge such as much flows or soil disposits from the construction site in downstream locations? It is there are evidence of venicles tracking soil off the construction site? It is there are evidence of venicle material, landscaping lems, or other debris piled on impervious surfaces (reads, drives) that could be washed with SW to a storm date soil, construction materials, landscaping lems, or other debris piled on impervious surfaces (reads, drives) that could be washed with SW to a storm date soil, construction materials, construction materials, or improve evidence control (ab)? It is there a need to repair, maintain, or improve endiment control BMPs (sit fence, check dams, fiber rois), sediment traphsial, intel protection, watties, straw balls, cuth cut-back, etc.? It is there a need to repair, maintain, or improve pood housekeeping controls (clean track out, pad, sweeping, construction materials management, straw balls, cuth cut-back, etc.) It is there are the distribution activities for 14 to 21 days willout stabilization? (except snow or frozen ground)? It is there are distributed areas that have not had construction activities for 14 to 21 days willout stabilization? (except snow or frozen ground)? It is the except and the distributed areas that have not had construction activities for 14 to 21 days willout stabilization? (ex	4. 9. Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, slit fence, purparishen boundary diversion, down gradent boundary sediment control, etc.) 7. Is there evidence of sediment discharge such as must flows or soil deposits from the construction site in downstream locations? 8. Is there evidence of sediment discharges use the construction site? 9. Is there a send of vehicles tracking soil of the construction site? 10. In dain of water body? 10. In dain of water body? 11. Is there a need to repair, maintain, or improve erosion control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface outpinning, pipe alone drain, dust control, etc.)? 11. Is there a need to repair, maintain, or improve sediment control BMPs (silt fence, check dams, fiber rolls, sediment traphasin, iniet protection, waters, trans valis, curb out-back, etc.? 12. Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, tetrifizationtic), port-poties staked down, fueling areas, concrete wash out area, proper curb ramps, still prevention, etc.)? 13. Are there places where BMPs are needed and should be installed or not needed and should be removed? 14. Are there places where BMPs are needed and should be installed or not needed and should be removed? 15. COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE 16. Series and a stability of the prevention, etc.) 16. Series and a stability of the problem and its location. If appropriate, describe (in general terms) with a restate to be completed. However, only if qualified (e.g., you are a designed to assure that qualified personnel properly its related when corrections are made. 16. File P. O. T	5. Have all corrective action items from previous inspections been addressed and documented within the time frame allotted by the inspector?			X
7. Is been evidence of selicitient discharge such as much flows or soil deposits from the construction site in downstream locations? 3. Is there evidence of vehicles tracking soil of the construction site in downstream locations? 3. Is there soil, construction material, land-scaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a store of the soil of the s	6. Are SW flows entering and leaving the construction site controlled, managed, or diverted around the site? (e.g. perimeter controls, berms, silt fence		-	_
3. Is there evidence of vehicles tracking soil off the construction site? 3. Is there soil, construction material, landscaping items, or other debris piled on imprevious surfaces (roads, drives) that could be washed with SW to a storm drain or water body? (In Shere a need to repair, maintain, or improve sediment control BMPs (temporary stabilization, erosion blankets, mulch, vegetated strips, fir rap, surface coughning, pipe slope drain, dust control, etc.) 1. Is there a need to repair, maintain, or improve sediment control BMPs (all fence, check dams, fiber rolls, sediment trapibasin, inite protection, wattles, straw balls, curb out-back, etc.) 1. Is there a need to repair, maintain, or improve good housekeeping control (sidean track out pad, sweeping, construction materials management, teterfixash control, port-o-potities staked down, fueling areas, concrete wash out area, proper curb ramps, spill prevention, etc.) 3. Are there disturbed areas that have not had construction activities for 14 to 21 days without stabilization? (except snow or frozen ground)? 4. Are there places where BMPs are needed and should be installed or not needed and should be removed? 5. COMMENTS AND CORRECTIVE ACTIONS FOR SWPPP COMPLIANCE 6. Senderly the problem and its location, if appropriate, describe (in general terms) what needs to be completed. However, only if qualified (e.g., you are a designer) should you be mandating specific BMPs be install. Include the date when corrections are made. 5. File N.O.T. 1. Problem and its focusion and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly wired and evaluated the information submitted (etc.) responsible for gathering the information, the material submitted stable information, including and on my inquiry of the person or persons who manage the system, or those persons fellow information, including the information, the material submitted (etc.) is the best of my information. Includin	upgradient boundary diversion, down gradient boundary sediment control, etc.) 7. Is there evidence of sediment discharge such as mud flows as solid associations the search with a second sediment discharge such as mud flows as solid associations.	×		
9. Is bere soil, construction material, landscaping items, or other debris piled on impervious surfaces (roads, drives) that could be washed with SW to a storm disin or water body? 10. Is there a need to repair, maintain, or improve evosion control BMPs (lemporary stabilization, erosion blankets, mulch, vegetated strips, rip rap, surface coughening, piles slope drain, dust control, etc)? 11. Is there a need to repair, maintain, or improve evosion control BMPs (slit fence, check dams, fiber rolls, sediment trapibasin, inlet protection, wattles, straw balls, curb out-back, etc? 12. Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, tearhrash control, porto-polities staked down, fueling areas, concrete wash out area, proper curb ramps, spill prevention, etc)? 12. Is there a need to repair, maintain, or improve good housekeeping controls (clean track out pad, sweeping, construction materials management, tearhing that the deal of the control of the con	8.
