

## Public Street Connectivity Plan for Proposed Subdivision at 9215 E. 500 S., Huntsville

After discussion of various options for public street connections with Felix Lleverino and other members of the Weber County Planning Department, the conclusion was reached that it was unfeasible to create a public street within the boundaries of the Kinderfarm. All lots that have already been or are in the process of being subdivided from the Kinderfarm have direct access to 500 S. After we build our home, there will no longer be sufficient frontage on the Kinderfarm plat for any additional houses without obtaining access exceptions, and none of my siblings are currently planning to build in Huntsville. Because access to neighborhoods to the south and west of the Kinderfarm is unfeasible (see pre-application meeting notes), there is no need for a public street through the Kinderfarm.
