You must've not talked with them about us since the working session of September 8th. The information was simply not passed down I would guess. I just emailed Commissionaire Froerer about it since he made the final decision on that day. I'm inviting you to inquire the situation with any of the commissioner whenever convenient. The decision was to extend to October 1st 2024 to install all our light shields (I'm committing to 70+ per year) in the meantime they were letting us build 3 yurts in total with a compost toilet. Looking forward to getting this resolved and continue the discussion about our next steps. Thank you Steven for your time and attention.

Regards,

Pascal,

I have not heard this from the county commissioners. Last I spoke with them they told my office to not issue any permits. You can apply for a land use permit on Frontier for that to be considered. Until I hear from the County Commissioners that they have changed their mind, we cannot approve the yurt. This is because the site is still out of compliance with the outdoor lighting ordinance. I know they are out of the office this week but I am happy to have a conversation with the commissioners about this next week.

Thanks,

Steve

Hi Mr. Burton,

I stopped by the planning committee offices on Tuesday, I talked with Felix, he was very helpful but could only help me to a certain point. So on September 8th, the County Commissaires decided to let me until October 1st 2024 to have all my light shields installed (which currently we are purchasing metal flash sheets in large qty to make 70 this winter and install them in the Spring, 70 more next year) and also to let us build 3 yurts and a compost toilet on our property. Commissionaire Jenkins was saying something to the effect of issuing us the permit, but what do I need to present to the County for my temporary yurts at the base?...permanent on top of Express? Thank you for your time and attention.

Regards,

Pascal Begin
