

## Outdoor Light Plan

Nordic Valley - Yurts Project  
Permit Number: CUP2020-03

To accommodate the two new 30ft. Yurts, Nordic Valley will rely on their current existing outdoor lighting. See images below.

On our main barn, which is located directly to the West of the two (2) planned yurts, we have (7) 270 volts light fixtures with 200 watt bulbs. The nearby ski hill is also equipped with the same light fixture on every chairlift tower - two (2) per tower. The base of the resort where the two yurts will go is definitely well lit.
