

I am a member of Sourdough Wilderness Ranch. I own Lake East Lot 140.

Unfortunately, due to the snow loads this winter, our storage shed was crushed.

We need to rebuild a new shed adjacent to the damaged shed.

Prior to rebuilding, we will remove all debris from the previous shed and dispose of it offsite.

We plan to rebuild the new shed adjacent to the previous shed. It is a flat spot with 6" gravel fill

Description: 8'x10' storage shed, used for storing camping equipment and supplies

Proposed height: Sidewall height, 6'. 6:12 roof pitch

Please approve the construction.

It will be delivered and installed on site by TopShed out of Ogden, UT. Licensed and Insured. Warranted against structural defects for 30 years.
