

Rick Grover
Weber County Planning Director
2380 Washington Blvd. Ste. 240
Ogden Utah 84404

Dear Mr. Grover,

I would like to Request a variance to Chapter 108-18 Drinking Water Source Protection, specifically Sec 108-18-5(2). The request is a variance to install a packed bed media septic system within a shown zone 2 of one of the sources for Huntsville Town's Drinking water supply.

Under Sec 108-18-10 Administration, there is a provision in there that the Technical Committee may grant a variance to this code

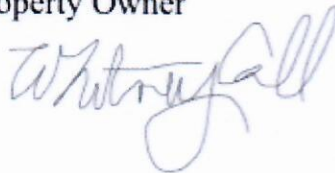

The reason I feel this variance is warranted is because in conversation with Huntsville Town the main and only source that they are presently using for their system is the Wishing Well source that was developed in 2019. The property that we are proposing to install the septic system on is within Zone 4 of the Wishing Well Protection Area.

Attached you will find a letter from King Water Resources addressed to the Weber-Morgan Health Dept. and provides support for the variance request, as well as a letter from Huntsville Town.

Please let us know when we can get this item before the Technical Committee for the variance.

Sincerely,

Property Owner
