	QTY	UNIT	TOTAL
The pump that is installed in John Reeses well is a 1 Hp 230 volt single phase Franklin motor, and a 13GS10 Goulds pump end. That pump will pump 13 GPM with only 15' of draw down after and 1 Hour then the pump will sustain 13 GPM for however long it asked to. The well was test pumped for 48 hours. This pump system will very easily sustain 2 homes. If there is any questions or concerns please feel free to contact us. Thanks.
